- a) ... hurried to denounce
- b) ... do not believe
- c) ... must avoid sharing
- d) ... must learn to

D – Creative Writing

1. Write a comment.

Lösungsvorschlag für B:

Last week I read an article about the digital age. The author or the article argued that Wi-Fi should be free for everyone on earth. It is possible but does it make sense?

In my opinion free Wi-Fi is urgently needed because it would close, at least partly, the gap between rich and poor people. Some students come from poor homes and cannot afford to pay for private Wi-Fi. If free Wi-Fi was provided for everyone, the students who need it the most would be able to do online research and finish their homework. Apart from the quality of parenting, access to Wi-Fi can have a tremendous impact on educational success. As a result, everyone would have at least roughly the same chances of success in the education system. In conclusion, we must give everyone the same opportunities.

2. Task A: Job application email

Dear Sir or Madam,

I am a seventeen-year-old exchange student from Germany who is spending a year in the USA. Since we now have summer holidays, I would like to spend a lot of time outside and earn some extra money. I found the add on the Internet and I am very interested in working as a lifeguard. As I have been a volunteer for the DLRG (German Life Saving Association) for years, I already have some experience working as a lifeguard. I have also completed the lifeguard training with the DLRG. Furthermore, I am a very responsible and reliable person who loves to work in teams. Additionally, I am in very good physical condition and pay attention to my diet which I think is important for the job. That is why I am sure that I would fit in very well with your team.

I am looking forward to hearing from you.

Best wishes

X

Task B: Lösungsvorschlag für A:

Street art is pure inspiration

In my opinion street art is about to become the most famous form of popular art. First, there is a difference between creating something that will be inside a gallery with just a few people seeing it and having your art in a busy public area where thousands of people can see and appreciate it. You can address many more people and you can send your message to people who didn't want to hear it in the first place. Second, thanks to Banksy street art is appreciated and respected by the majority living in large cities. As a child growing up in Berlin I was greatly inspired by street art. I do not come from an artistic family, so I rarely went to a gallery or art museum, but I spent a lot of time in the streets of Berlin, enjoying a kind of open-air art gallery. Graffiti inspired me to the point of wanting to be an artist myself. Now I am applying for art school.

E – Interpreting

1. Trip for the summer holidays

- a) Es ist eine Safari durch den Denali Nationalpark. Man wird Grizzlys, Elche, Karibus, Dall-Schafe und Wölfe sehen. Außerdem ist ein Besuch im Alaska Sea Life Center und eine Schifffahrt zu den Fjorden geplant. Wir können sogar Schlittenhunde beim Training für die Rennsaison beobachten.
- b) Der Trip dauert acht Tage und wir werden in unterschiedlichen Hotels schlafen.
- c) Nur zum Teil. Es wird jeden Tag Frühstück geben, aber nur dreimal Mittagessen und nur einmal Abendessen. Um die andere Verpflegung müssen wir uns selbst kümmern.

2. Blog for English lesson

- a) Neil Ibata, a fifteen-year-old student from France, surprises scientists with a new discovery in astrophysics.
- b) He is only 15 years old, and still he already published a study in 'Nature', which is an important British science magazine.
- c) The 15-year-old made the discovery at the Astronomical Institute in Strasbourg, where he was doing an internship with his father. Together with his father and 15 other astronomers he worked on the article.
- d) According to his own statement, Neil was only playing with the data when he made his discovery by accident. He investigated the distance and speed of dwarf galaxies.
- e) Neil's father started to teach him mathematics and physics at the age of five and now Neil is a famous young scientist.
